WORK HISTORY

Junior Frontend Engineer Taylor and Francis

05/2022 - 07/2023

Bangalore

Achievements/Tasks

- **Project 1: Dynamic and Intuitive Frontend UI Dashboard**
- I successfully led the development of a cutting-edge Responsive Report Generator UI Dashboard using JSX, TypeScript, React, and Hooks.
- The dashboard provided users with advanced features like checkboxes, dropdowns, and search options to generate customized reports based on their business requirements.
- Its intuitive and responsive design ensured a seamless user experience across various devices.
- **Project 2: Promotional Campaign: Free Online Books**
- Developed a responsive promotional campaign webpage featuring free online books using HTML, CSS, Angular, TypeScript, Testing, API calling and Debugging.
- Implemented search functionality, routing, header, sidebar, and navigation features to meet business requirements.
- Conducted unit tests to ensure code quality and functionality.

PERSONAL PROJECTS

1) Resort Valley Website

- **AIM:** The main motive of making this website is to implement different ideas that enhance user attraction.
- fully responsive, Cross-Browser Compatibility the pages are divided into different sections.
- The most important section is the Room, about, header, and Price Filtering and sorting, using ReactJs, Context-API, React-router, functional components)
- **Link:** <https://resortvalley.netlify.app/>
